Examiner  
USPTO  
Alexandria, Virginia

*Fax from - William Rogers - 210-408-1804    Fax to - John Lacyk - 571-273-8300*

**Dear Mr. Lacyk,**

Called a couple of times and left messages [April 9th & 12th] - received no response. We realize you must be quite busy; therefore, FAX seems to be the best method of communication and record keeping.

After recently noticing on PAIRS decent positive movement reference patent application #10627286 [electromagnetic brain animation]; we also noticed shortly after that a latest indication on the "Transaction History" stating "Untimely (Late) Amendment Filed". If this specific indication references the cause of the late filing is due to all pertinent documentation being Lost by USPTO and certainly not by us - then we have no concern. USPTO received ALL amendment documentation via certified mail way back on April 25, 2006 [a year ago this month].

As I'm sure you remember, when contacting you 5 months later in September, '06 on a follow up inquiry, you relayed to me that said documentation could not be found. After we related possession of all documentation [phone calls, certified sending and receiving of the 'amendments, etc] validating exactly what had taken place, you stated a search would ensue immediately. I called you back 3 days later and you had thankfully found all lost documentation. Therefore, please, by **phone, fax** or **email** indicate to me the specific meaning and indication of the noted "late arrival of amendments".

It would be very appreciated if we would hear from you within 10 working days.

**Bill**
